A B O U T U S

WHO AM I?

Hi, I'm Lordy Hassan Kajila Computer scientist, Numerician, Developer and Researcher evolving in Artificial Intelligence (Machine Learning & Computer Vision), and in Data Science. What characterizes me is creativity. I put this skill to use in the development of software and multi-platform applications (Mobile, Web, Desktop) for 4 years as a freelancer.

I like coding, I know it's not a very original activity, but this hobby suits me perfectly. Programming requires a certain sense of organization and attention because you have to build an algorithm, manage bugs, establish a schedule, etc.

But what I enjoy above all is spending time doing quality work, with the aim of satisfying my customers. I like people to appreciate my finished products.

I also like to cultivate myself by reading.

My other hobbies

I love listening to music, it may not be very original, but for me, it's a real passion. I have downloaded a lot of albums that I like to listen to when I code. I also like to walk.

Learn

Proactive

Persevering

I love Code

Curious

Teamwork

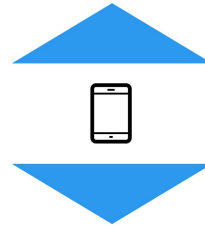

Punctuality

I am working as a
freelance, and happy
to tell you
that 5+ projects done
successfully!

CONTACT ME

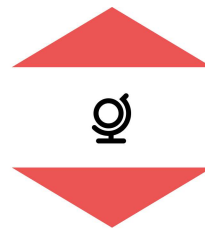

HERE ARE SOME OF MY EXPERTISE

MOBILE

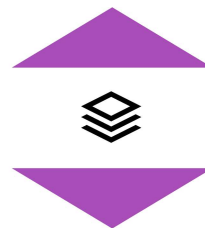

Mobile Android development with
Java/XML and Kotlin.

...

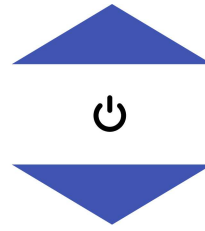

WEB

Fullstack web development with Php,
JavaScript and HTML/CSS.

MULTIPLATFORM APP

Multiplatform Development: Android, iOS,
Web, Windows with Dart/Flutter.

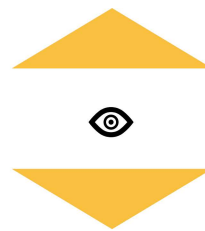

EMBEDDED SYSTEM

Programming of Arduino and Raspberry microcontrollers with C++ and Python.

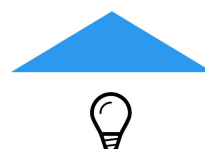

DATABASE

Designing SQL and NoSQL databases with DBMSs like MariaDB, MongoDB, etc...

COMPUTER VISION

Design of basic artificial neural networks for object recognition in images.

ELECTRICAL

Assembly, installation and maintenance of electrical installations in buildings.

DOMOTIC

Installation of solar panels and automatic home systems.

NUMERICAL TOOLS

Handling of the numerical calculation tool.

...

MY SPECIALTY

MY PROGRAMMING SKILLS

The programming languages that I have been able to learn and work with, the rough statistics below are the result of years of learning and practice.

I have already worked with one of each language described in my projects

Python	90%
Java/Kotlin	80%
HTML5/CSS	90%
Flutter/Dart	90%
C/C++	90%
JavaScript	40%
SQL	60%
PHP	70%
